PROGRAM OBJECTIVES & OUTCOMES

Objectives:

1. Understand the criteria for selection of drugs and polymers for development of dosage forms, their formulation and evaluation.
2. To know the various approaches for development of dosage forms.
3. Understand the new technologies used in industries for development of dosage forms.
4. Understand the importance of packaging materials.
5. To know the stability aspects of packaging materials and dosage forms

Learning Outcomes:

1. Know the formulation additives of dosage forms.
2. Formulation of dosage forms and quality control tests.
3. Know the optimization techniques.

ABOUT BIPS

Balaji Institute of Pharmaceutical Sciences is situated on a sprawling 1.2 acres of campus in a rural setting near Laknepally on the Warangal– Narsampet Highway and is well connected to the city and Villages. The outstanding infrastructure facilities were supported for Under Graduate and Postgraduate teaching programs, including the state-of-the-art classrooms, equipment, aesthetically designed buildings and individual departments with lively shapes and outlooks. The infrastructure was being facilitated in such a way that sureties it's most excellent ideal utilization according to Kakatiya University, PCI norms. The Management of the Institute strives to fulfill the stringent international standards of training the students to succeed in the state and national level examinations and become proficient at serving humanity at large. The modern building has excellent, well-designed

lecture halls, convenient seating arrangements, and audio-visual facilities. The Management has always ensured the availability of adequate physical infrastructure. It provides optimum infrastructure utilization by meticulously planning.

The institution has excellent infrastructural facilities and pedagogical methodologies used for teaching learning process, which are properly maintained and upgraded according to need of higher education and meet the regulatory requirements of AICTE, PCI, Kakatiya University, Warangal. The classrooms are well equipped with multimedia and audio-visual equipment like LCD projectors, displays to facilitate effective teaching/learning. The Institute has well equipped and operational laboratories with all the required advanced infrastructural facilities for effective operations.

PROGRAM OBJECTIVES & OUTCOMES

Objectives:

1. To understand the development of analytical methods by using chromatographic Method
2. To learn about the system suitability parameters and their significance.
3. To become aware of analytical method validation parameters, ICH and FDA guidelines for method validation

Learning outcomes:

1. Logical view on how to develop analytical methods.
2. Key factors affecting method development and how to optimize the method.

PROGRAM OBJECTIVES &

OUTCOMES

Objectives:

- Understanding the need, basic guidelines, content and process for Value Education.
- Understanding the human aspirations in the family and society.
- Understanding the harmony parameters of I with the Body (Sanyam and Swasthya).
- Understanding the basic knowledge for Humanistic Education.

Outcomes:

- To know the knowledge on human values in between human & human relations and family & society relationships.
- To know the knowledge on Ethical Human Conduct.
- To know the knowledge on the harmony in the society.

PROGRAM OBJECTIVES &

OUTCOMES

Objectives:

1. The main purpose of the workshop is to understand the complexity of herbal drug
2. analysis and to find out the appropriate and scientific solution for the same. >
This will help the Ayurvedic/Herbal Industry to grow faster and gain more recognition worldwide.
3. It will also help candidates to master the art of analyzing and understanding the complex structure of the ayurvedic/ herbal drugs

Learning Outcomes:

1. Guidance for preparation of testing/stability testing protocol for herbal products
2. The program will help in undertaking standardization/analysis and research of herbals in right direction.

3. Interpretation of analytical data, nature of phytoconstituents, application of spectral methods of analysis, etc.

PROGRAM OBJECTIVES &

OUTCOMES

Objectives:

- The objective of the present workshop is to provide knowledge for students on various analytical methods.
- This workshop cum training Programme intends to educate and to provide virtual demonstration of the commonly used analytical instruments i.e. Fourier Transform- Infrared Spectroscopy (FT-IR), Gas chromatography (GC), GC-Mass Spectroscopy (GC-MS), High Performance Liquid Chromatography (HPLC), Scanning Electron Microscopy (SEM) and Transmission Electron Microscopy (TEM) to the students.

Learning outcomes:

1. The fundamental principles of instrumental measurements.
2. Applications of these principles to specific types of chemical measurements (types of chemical measurements)

samples analysed, figures of merit, strengths and limitations).

3. Examples of modern instrumentation.
4. The use of instruments to solve real analytical problems.
