TEACHING-LEARNING PROCESSES

The mentors of the various classes are a great help in classifying the pupils. Slow learners are also identified based on their performance in the previous semesters, university assessments, and internal examinations. In addition, the variety of continuous assessment components, such as assignments, seminars and group discussions, guest lecturers, lifeskills training programme, quizzes, class tests, projects, hospital visits, internships, viva voce examinations, and attendance, allows for effective measurement of students' learning levels. Furthermore, the identification of distinct learning levels is aided by teacher-student interactions. Regularly, faculty members and other committees review student's academic progress and offer them advice on how to improve their performance to ensure their academic advancement. In addition, activities are included in order to encourage a competitive spirit and a positive outlook. This process provides a framework for monitoring the pupils' subsequent growth.

Measures taken for improving academic performance of the students

- ❖ The subjects in which the students are determined to be sluggish learners are the target of remedial additional classes.
- ❖ Each student receives academic advice from the concerned subject teacher.
- ❖ Advanced students participated in group discussions for improved understanding.
- ❖ Through a mentorship programme, personal counseling is provided in order to take care of the students.
- ❖ The mentors keep track of the entire student's academic progress, and they occasionally update the parents on this information.
- ❖ All kinds of support are provided to the slow learners through a mentor-mentee system.
- ❖ The faculty's constant efforts to help slow learners have improved the student's knowledge of the subject matter and their performance.

- ❖ In addition, the mentor points out additional talents and strengths and encourages the mentee to contact them. This boosts self-confidence and enhances academic success.
- ❖ In order to provide further support, the mentor also connects the struggling students with topic professors they feel comfortable working with. The college makes sure that a slow learner finishes all of his courses by the deadline.

The College has established Mentoring System. Each faculty will be the mentor for a group of 10 to 15 students. Department faculty will continue to be mentors for the same group of students till completion of the course.

Responsibilities of Mentors:

1. To meet the group of students at least once in a Week.
2. To continuously monitor, counsel, guide and motivate the students
3. To advise students regarding choice of internship, project, summer training and placements.
4. To contact parents/guardians if situation demands e.g. academic irregularities, negative behavior and interpersonal relations, detrimental activities etc.
5. To provide professional guidance to students in their career development.
6. To keep contact with the students even after their graduation.
7. To intimate HOD and suggest if any administrative action is called for.
8. To maintain a detail progressive record of the student.
9. To maintain a brief but clear record of all discussions with students.

Type of Mentoring:

- Professional Guidance - regarding professional goals, selection of career, higher education.
- Career advancement - regarding self-employment opportunities, entrepreneurship development, morale, honesty and integrity required for career growth.
- Course specific - regarding attendance and performance in present semester and overall performance in the previous semester.
- Lab guidelines - regarding Do's and Don'ts to be implemented in the lab
